

Change order/List front

The chgorder command allows you to select an item and insert it in the list under the previous item. The selection sequence is: the first selected item will follow the next selected

CHGLNUP
SWAPEND
CHGORDER
LISTFRNT
JOIN

follow this item. We can change the list order from the one shown. Let's make the square first, triangle next, then the circle and the bolt last.

Use the listfrnt command and select the square to be the first item in the list. Then select the chgorder command. select the triangle and then the square. Now, the triangle is next in the list and follows the square. Again select the chgorder command. Select the circle then the triangle. Again select chgorder, select the bolt and then the circle. The bolt will follow
